-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 1/4/2007 have been fully considered but they are not persuasive.

It appears that the Applicant has not provided any explanations regarding the relevancy of the inordinate amount of the number of cited references. The references have been placed in the file and have not been considered.

Applicant has amended the independent claims by adding the "offering the receivable corresponding to the invoice for sale to third [parties] party participants " and concludes that these changes provide patentable differences from Tarter.

In response, the Examiner disagrees and asserts that the offering receivable in the system of Tarter corresponds to invoice for sale and the term "parties" and "party participants" are similar and undistinguishable and provides no patentable distinction.

2. The information disclosure statement filed 12/01/2006 fails to comply with 37 CFR 1.98 because it does not include a concise explanation of the relevance of the listed references. It has been placed in the application file, but the information referred to therein has not been considered.

Thus the prior art rejection remains outstanding and is repeated below.

Information Disclosure Statement

3. The information disclosure statement filed 3/8/2006 and 11/16/2005 fails to comply with 37 CFR 1.98 because it does not include a concise explanation of the relevance of the listed references. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-18, 19-24 and 26-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tarter et al (US Patent No. 5,550,734).

As per claims 1-18, 19-24 and 26-27, Tarter et al et al disclose a computerized healthcare accounts receivable purchasing collections, securization and management system and method. The method and system comprise receiving data comprising an invoice with payable and receivable information from a first participant involved in a transaction and storing the information in a receivable clearinghouse and generating electronic invoice information in response to the invoice received from the first participant. The claimed participant being a healthcare provider and the claimed receivable clearinghouse being the "Pharmacy Fund, Inc." (PFI) of the system of Tarter et al. Applicant is directed to column 10, lines 25-38 of Tarter et al.

Art Unit: 3692

Tarter et al further teach transmitting the electronic invoice information on behalf of the first participant to a second participant or payor or obligor of the system of Tarter et al, the electronic invoice including one or more payment terms wherein one term requires payment of the receivable be sent to the receivable clearinghouse (column 10, lines 25-62, column 15, lines 13 of Tarter et al.); receiving payment from the second participant t (see also column 10, lines 25-62, column 15, lines 13 of Tarter et al.); recording a receipt of the payment in the receivable clearinghouse and crediting the receipt of the payment to the first participant. See column 15, lines 1-13 and column 14, lines 21-42 of Tarter et al. Since the PFI obtains the receivables, it would have been obvious to one of ordinary skill in the art that the receivables were offered for sale to third parties over a receivable marketplace associated with the receivable clearinghouse or PFI wherein the receivable marketplace being accessed by a receivable trading apparatus.

In any event, Field discloses a system and method for facilitating the selling and purchasing of a receivable. See the abstract of Field.

Field also teaches receiving a confirmation offer from a first participant comprising an agreement on an amount and a date, and forwarding the confirmation offer to the second participant. Field further provides a contract between a buyer and a seller. See figures 3, 4 and 7 of Field. Field then teaches providing means or steps for facilitating negotiations between first and second participants and coordinating fund settlements between the first and second participants. It would have been obvious to one of ordinary skill in the art at the time of the invention was made to incorporate the teachings of Field into Tarter et al in order to allow a first and second participant to

negotiate terms of an offer. The motivation would have been to provide a real world environment where terms of a contract or offer are negotiated. In the system of Tarter et al, the types of participants include a receivable owner sponsor and a receivable debtor sponsor. Field discloses respective banks and other participants may act on behalf of the respective receivable owner or receivable debtor for performing similar claimed functions.

The PFI in the system of Tarter resolve transactions on behalf of the receivable owner or receivable debtor. See column 32, lines 54-67 and column 43 lines 30-65 of Tarter et al. Both Tarter et al and Field et al disclose a management system for managing and reporting compiled data received from the participants.

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
